# Analysis of key aspects of the PSFC Financial Statement for the 4 week period ending 01/02/2022 & the 48-Week period ending: 01/02/2022

page 1 of 2

After these two analysis pages please find 21 additional pages. The first 3 additional pages are the income statement for the most recent 4-week period juxtaposed with the income statement for the 48 weeks. Then come the 6 pages that compare the 48 pandemic weeks this year with the 48 pre-pandemic weeks ending on 01/05/2020. The second set of 6 pages compare 48 weeks this fiscal year with the 44 weeks this fiscal year. The third set of 6 pages compares 48 weeks this year with the 48 weeks last year that were only partially during the pandemic. This report will be discussed at the General Meeting on 01/25/2022.

- A) Subsequent Event of Positive Significance: In the second week of January we received \$856,000 from the IRS. \$851,000 for payment of our 2020 Employee Retention Credits (ERCs) that we were owed and \$5,000 in interest due to us. Had this money arrived by January 02 our balance sheet on these statements being presented tonight would have shown 3.9 million in cash and about 1.5 million in other current assets. The 1.5 million in other currents asset is primarily what the IRS still owes us for 2 ERCs from 2021-see footnotes.
- B) The forgiveness application in regard to our second Paycheck Protection Program (PPP) loan is in the pipeline. The loan is for \$1,677,000. Once it is forgiven it will add to our income and subtract from our debt. As with the ERCs the effect is significant-look for the footnotes.
- Analysis of the effect on cash due to the basic operations of the Coop in the last 4 weeks ending 01/02/2022. We are finally coming close to break even when using this important measure of what happens to cash from our basic buying of groceries, selling of groceries and paying for expenses. This analysis ignores the effect on cash of changes in inventory and changes in how much we owe our vendors. This past 4-week period is good news, the best since the pandemic started. In the 4 weeks ending 01/02/2022 Operating Income was a loss of \$45,000. Add to that loss another \$36,000 for credits that we were owed to us but were paid to us during this period from May, June, July, August and September. That brings us to a subtotal of (\$81,000). Then subtract expenses that we did not pay money for: Depreciation of \$18,000 and Pension Expense \$59,000. This leaves us with a grand total of an "adjusted operating cash loss" of only \$4,000 for the 4 weeks or \$1,000 a week. This is quite positive.

Please note: The only pension money we were required to pay was paid earlier this year and was a leftover obligation from the previous year. Eventually we will no doubt see substantial required payments to our pension plan. In the long run pensions cost real dollars. As for depreciation expense, a healthy business should cover this expense so that money is available to buy needed replacement equipment. Please also note: This weekly loss number of \$1,000 would be about \$25,000 higher if not for our base mark-up being at 25% rather than the usual 21%. (\$100,000 higher on a 4-week basis.)

D) Gross Margin still a problem: Our gross margin at 20.07% for the 4-week period is really 19.07% when adjusted for the \$36,000 in credits we were owed from earlier in the year. This is an improvement compared to the prior 4 weeks of 18.76% but it is still not what we should be seeing. A target of 20.0% is more in line with historical norms for our shrink. (see note 3 on next page for shrink discussion)

Page 2 of 2 of Analysis of key aspects of the PSFC Financial Statement Definitions and Calculations for understanding the following attached 48 week and 4 week financial statements:

- <sup>1</sup> Gross Margin = Net Sales (money generated by members when we shop) Cost of the Goods Sold. The Gross Margin dollars divided by Net Sales dollars yields the gross margin percentage. The gross margin dollars are used to pay the expenses of running of the Coop.
- <sup>2</sup> The Coop marks up all items received for resale to try to generate enough money to cover the expenses of operating the Coop. As of 10/13/2020 products are marked-up 25% for most members (temporarily up from 21%) above the delivered cost. The exceptions: vitamins and supplements are marked-up an additional 10% above that; cheese, an additional 3%; bulk items, an additional 7%; organic produce, an additional \$1.10 per case to the delivered case cost; conventionally grown produce, an additional \$.50 per case; organic bananas, an extra \$2.50 per case in addition to the \$1.10; and conventional papayas, an extra \$1.00 in addition to the \$.50. There are other minor addons that also are part of the mark-up. The result is an estimated overall current markup of 26.7%.
- <sup>3</sup> Shrink and perfect gross margin have been part of our financial analysis since the Coop started in 1973. Perfect gross margin is reached when there is no spoilage, no theft, etc.; by the way, it is never reached. Because the Coop is usually run at about breakeven we pay attention to how far from perfect we are in order to remain financially sustainable and to be alerted to problems that have a financial impact and therefore need to be solved or improved upon. The goal is to keep our low-price structure by solving problems instead of raising prices. Shrink is the amount of imperfection. It is calculated by comparing the actual gross margin to the perfect gross margin. Our perfect gross margin is calculated by dividing .267 (the mark-up) by 1.267 which =21.07%. We estimate that a typical natural foods supermarket uses a markup of about 56% to yield a gross margin of about 34%. Our estimated shrink for the 48 week period ended 01/02/2022 is 1.17% as a percent of sales. This is calculated from "perfect" gross margin of 21.07% minus gross margin from page 1 of 19.90%=1.17%.

**Footnote C)** In reality our cash is higher than this by more than \$850,000 due to the receipt of money from the IRS for our 2020 Employee Retention Credits (ERCs).

**Footnote D)** In reality our "other Current assets" are lower than this by more than \$850,000 due to the receipt of money from the IRS for our 2020 Employee Retention Credits (ERCs). The IRS still owes us about 1.5 million for 2021 Q1 and Q2 ERCs.

Footnote E) The "Bank Loans Payable" line is the second PPP loan that we received and that should be forgiven. Once it is forgiven this money we no longer be on the balance sheet as debt but instead will be on the income statement as "other income". It will inflate the bottom line.

Footnote C) In reality our cash is higher than this by more than \$850,000 due to the receipt of money from the IRS for our 2020 Employee Retention Credits (ERCs).

Footnote D) In reality our "other Current assets" are lower than this by more than \$850,000 due to the receipt of money from the IRS for our 2020 Employee Retention Credits (ERCs). The IRS still owes us about 1.5 million for 2021 Q1 and Q2 ERCs.

Footnote E) The "Bank Loans Payable" line is the second PPP loan that we received and that should be forgiven. Once it is forgiven this money we no longer be on the balance sheet as debt but instead will be on the income statement as "other income". It will inflate the bottom line.

				\$1,294,056				\$1,077,301

Footnote C) In reality our cash is higher than this by more than \$850,000 due to the receipt of money from the IRS for our 2020 Employee Retention Credits (ERCs).

Footnote D) In reality our "other Current assets" are lower than this by more than \$850,000 due to the receipt of money from the IRS for our 2020 Employee Retention Credits (ERCs). The IRS still owes us about 1.5 million for 2021 Q1 and Q2 ERCs.

**Footnote E)** The "Bank Loans Payable" line is the second PPP loan that we received and that should be forgiven. Once it is forgiven this money we no longer be on the balance sheet as debt but instead will be on the income statement as "other income". It will inflate the bottom line.
